

NO Math Failures!

A Student understands a Math Topic - A Math Success

A Student does not understand a Math Topic - A Math Failure

Being a Math Failure can be psychologically devastating for a Student, and, worse yet, lead to other "failures" in many ways.

Are there any students in your School who are Math Failures?

IF you teach a Student a Math Topic the Student will get an A or F on that topic. Understand it or not! Success or Failure.

Ready for some Good News?

If you teach a Student appropriate Math Topics (i.e. Proper Content) with good Pedagogy (SPIKE is the best) the Student will learn the Topic and not be a Math Failure for that Topic.

I discuss this in more detail in a Golden Rule Math book you may download for free at:

<https://goldenrulemath.com/struggle/>

You will also learn that Your School can achieve this with *Magic Carpet Math* Topic by Topic to supplement your Math Program for Struggling Students who are Failing some Math Topics.

Visit: <https://www.triadmhinc.com/mcm/> for details.

This will be of special value for any students you have who are not excelling in Math, especially students who don't like Math for some reason.

No more Math Failures!

We can have a Zoom meeting with your School Leaders to discuss this further and get you started.

Just contact me.
