

SuperCharge Your School's Business Plan

SuperCharge FIVE Ingredients of your School's Business Plan by SuperCharging your School's Math Program as follows:

Triad Math can provide and deliver Your School a revolutionary 21st Century Math Program much better than ANY public school's obsolete 20th Century Math Program, and better than any other Private Schools will have UNLESS they are using ours.

We call it *Dr. Del's Magic Carpet Math Six Tier Math Program* and it is Optimal for ALL students and ALL students Succeed.

Magic Carpet Math is far and away the best Math Program that exists today thanks to several 21st Century Technologies that the Math Education Community have not yet embraced.

For the sake of time, just assume this is true. In the P.S. you may learn how to prove all of this is true.

As you will see, our primary focus has been on the Homeschool community with great results. However, several new technologies now make this possible for Private Schools too.

Now here are Five ways you can SuperCharge Your School's Business Plan with *Dr. Del's Magic Carpet Math Six Tier Math Program*

1. Recruits an A+ Math Teacher for all of your post elementary Math Students from Algebra through Calculus at a fraction of what any normal good Math Teacher would cost your school, on a per student basis.

Indeed you won't have to worry at all about your next year's Enrollment Numbers when making staffing decisions.

Your Math Program's costs will be on a per student basis for any number of students.

Dave Pennington, President of Schola, has told me this is an almost unsolvable challenge for most private schools today. Until now!

2. This Math Program will improve your school's Retention Rate since any other school nearby will have a much poorer Math Program.

This will be very easy for your students and their parents to understand and brag about. Great word of mouth advertising.

3. This Math Program will improve your Recruitment process since Math is a huge problem for most parents and this is now solved at Your School.

This alone will be a big reason for some parents to choose Your School.

4. This Math Program will yield several great stories for your school to tell that are based on demonstrable facts.

I agree with Ralph Cochran, CEO of Schola, that stories, word of mouth, local articles and social media posts are the best, and least expensive, marketing processes.

How many schools can claim, and prove, their Math Program is vastly superior to most other schools' Math Program?

We will give Your School many stories and articles you can publish locally.

This can reduce your acquisition cost of new students dramatically from traditional ways of marketing and selling your school.

5. The Math Program will help eliminate what Ralph calls the Gap, i.e. improve Your Profit or lower Your Loss.

There are several reasons this is true.

It will improve your Retention percentage which has a huge impact on your P & L.

It will lower your Recruitment costs. This will also have a huge impact on your P & L.

It will lower your delivery costs while improving the quality of your math program.

A good spreadsheet with variable inputs will be "mind blowing" for most school leaders. We can help you do this.

Conclusion and Invitation
