

Practical Algebra and Geometry, C1- C12

Dear Parent/Coach,

Wow! How's our/your student doing?

Most students get through the first 12 Lessons pretty fast.

Guess what?

After C12, assuming your student can do the PreAlgebras 10 Lessons, your student is NOW READY for: Ready? Drum Roll!

Practical Algebra and Practical Geometry.

All that is needed for a wonderful career in the Military or many Technical Careers.

How many Lessons?

Algebra TEN
Geometry EIGHTEEN

Just go to my website and download the Six Tier Syllabus, and look at Tier 2.

Most students will learn this in less than a semester.

Indeed, in the next Message I'll tell you what else they will learn in Tier 2 in about one semester.

YES, and this is all thanks to the TI-30Xa.

Without it, or some scientific calculator, it would take MUCH LONGER to learn these things.

No schools teach this so far as I am aware.

It is dramatically different and better than the Standard Math Curriculum taught in all the Math Programs and Textbooks that I am aware of.

The next Message will probably surprise you even more!

Til then, Golden Rule!

Craig
