

College Bound Math - Tier 3

Dear Parent/Coach,

Your student might be College Bound.

So what more Math will be needed?

Probably at least enough to do fairly well on the SAT or ACT of some other standard Math Exam your College or University might demand,

You can best see these Topics in my Tier 3 Syllabus you may find on my Website.

Some will be Topics that might be useful in the future to your student.

Some not, but need to be learned for the Exams.

In Tier 3 we use a Math Textbook for the first time that was written by Dr. George Simmons who I consider the best Math Teacher of the 20th Century.

PreCalculus Math in a Nutshell. Geometry, Algebra, and Trigonometry.

Wonderful book, 119 pages, No Fluff, still in print and less than \$20 on Amazon.

<https://www.amazon.com/Precalculus-Mathematics-Nutshell-Geometry-Trigonometry/dp/1592441300/>

No school that I know of has ever used it. Wonder why.

I'll tell you a lot more about it in the Video I will be making of this Message. See the P.S. to find it.

"Why didn't I use this book in Tiers 1 and 2 for Practical Algebra, Geometry, and Trigonometry?" you might ask.

Still way too many math topics unneeded for Practical Math, and it didn't teach how to use a Scientific Calculator.

Indeed, I only use about 20% of this book for Tier 3.

But, for STEM in Tier 4 I use all of it, plus much more, of course.

Tell you all about that in the next Message about STEM Math.

I recommend you buy this book ASAP. Thank God it is still in print.

Next Message will be about STEM Math and IF your student is interested in STEM it will be the most important Message you will be getting from me.

Hope your/our student is doing well.

Golden Rule!

Craig
