

Math Adventures!

Dear name,

All my life all I really wanted was to have a lot of adventures.

Math was the key ingredient for me to have many adventures.

Once you learn Practical Math YOU will be able to do many many things that you could not do otherwise!

*How and Why Public School Math is Destroying the USA* in chapter 24 I describe four of my business adventures.

I'll tell you a little bit about them and the next few emails.

Of course, you can't have the same adventures I did, but now in the 21st Century there are many more adventures you can have, if you know Practical Math.

There'll be many career paths you can follow that would otherwise be closed to you.

Hope you're doing well with this Practical Math program.

In future emails I will also tell you how you can go beyond it, if you wish to.

You can actually learn all of Math you will need for any Science or Engineering or technical career very easily today, as you will learn.

Keep up the good work
