

My two math Saviors

Dear name,

In my previous email I told you how I struggled and disliked Algebra in High School, and why.

In chapters 9 and 12 in my book *How and Why Public School Math is Destroying the USA* I will tell you how I was blessed with two wonderful teachers who "saved me". Miss O'Hair in Geometry and Dr. Clint Gass in College Algebra. Wonderful teachers.

The bottom line is that when the *proper content* is taught to you with a *proper pedagogy* by a good teacher all math is easy to learn.

And it's much easier today thanks to several modern technologies.

As you know the scientific calculator makes doing any kind of arithmetic calculation very easy.

But also my Tutorial Videos are actually better than listening to some Lectures that I might give or even an on-site tutorial since you can control the tutorial videos.

You can pause back them up, take a break, rewatch them etc Self Paced.

And of course they have to be closely coordinated with exercises which is where you really 'learn math by doing math'.

And when you learn geometry from me and also then trigonometry you'll find it's equally easy.

Keep up your good work

Craig Hane, Ph.D. aka Dr. Del
