

## **A Fairly Typical Problem for a Coach**

**Hi, my son has been enrolled in triad math, and is in tier 3.**

**He is finding, though, that he isn't retaining alot of the past information learned.**

**He said it's pretty easy to pass the test to move on to the next lesson, but he is noticing gaps.**

**Is this normal?**

**What should we do?**

**He was really enjoying it until the beginning of tier 2.**

**Go to: <https://homeschoolertoday.com/superior/>**

**and study Chapters 7 and 8 and Addendum 3**

**Most students need a good Coach, or must learn to coach themselves.**

**These Chapters explain how to do that.**

### **The SECRET of SUCCESS**

**Review - Practice - Review - Practice - Review - ???**

**NOW, a Coach does NOT need to know Math.**

**Dr. Del is the Teacher via the Tutorial Videos and Notes and Exercises. BUT, Dr. Del can't be the Coach, who must be someone local with the student.**

**So be sure to get your Student a good Coach!**
