

# The Triad Math Army: A Comprehensive Overview

Dr. Craig Hane positions his program as a dual-purpose solution for adults seeking life improvement and parents of teenagers looking for a competitive edge. The program is built on the premise that "skilled success" is achieved by combining technical proficiency (Math) with strategic decision-making (Wisdom).

## 1. The 21st Century Math Methodology

Dr. Hane argues that traditional math education is failing 90% of students. His "21st Century" approach differs from standard schooling in several ways:

- **Efficiency and Speed:** He claims that the "Practical Math" foundation—covering Algebra, Geometry, and Trigonometry—can be mastered in just three to four months with a commitment of five hours per week.
- **Tool-Based Learning:** The curriculum emphasizes the use of the scientific calculator to remove the "drudgery" of manual calculation, allowing students to focus on conceptual understanding and application.
- **Career Readiness:** The primary goal of the initial tiers is to empower students for high-income technical careers or military entrance exams.
- **Scalability:** For those pursuing higher education, the program extends into "Scientific Math," including Calculus and other college-level requirements, delivered via automated tutorial videos, notes, and exercises.

## 2. The Wisdom Tools Library

A unique aspect of the membership is the "Wisdom Tools Library," which Dr. Hane describes as a collection of mental frameworks gathered over his long career.

- **Consequential Thinking:** The core of a "Wisdom Tool" is the ability to accurately predict the short-term and long-term consequences of an action.
- **Decision Empowerment:** By understanding these consequences, members are taught to choose actions that align with their desired life outcomes.
- **Ongoing Growth:** The library currently contains over two dozen tools and is described as an expanding resource for members.

## 3. Educational Critique and Resources

Dr. Hane provides significant context for his mission through his published works, which he offers for free to encourage a shift in educational perspective:

- **Systemic Failure:** In his book *How and Why Public School Math is Destroying the USA*, he argues that the current system is detrimental to both students and teachers. He specifically points to chapters 19 through 22 as essential reading for understanding the "math crisis."
- **The "Golden Rule" Alternative:** His book *Golden Rule Math for All God's Children* serves as a manifesto for his teaching style, which he claims can turn math-averse students into successful learners.

#### 4. Membership Structure and Support

The program is designed to be interactive and low-risk to encourage enrollment:

- **Pricing Tiers:**
  - **Standard:** \$30/month.
  - **Annual:** \$300/year.
  - **Lifetime:** \$1,000 (with a mention of credit-building assistance via bank loans for this tier).
- **Guarantees:** A 30-day "no questions asked" money-back guarantee is provided to allow users to test the automated tutorial system.
- **Community and Access:** Members have access to a forum for questions and receive a "roadmap" via a series of advisory emails from Dr. Hane to guide their progress.
- **Direct Communication:** Dr. Hane provides his personal email ([craig@hane.com](mailto:craig@hane.com)) for inquiries, signaling a high level of personal involvement in the "Army."

#### Conclusion

The program is presented not just as a tutoring service, but as a holistic "life improvement" system. By stripping away the complexities of traditional math and adding a layer of practical life philosophy, Dr. Hane aims to provide a fast track to technical employment and personal stability.
